## §319.56-21

- (a) Inspection and treatment for pests of the family Tortricidae. An inspector must take a biometrically designed sample from each lot of apples or pears that are offered for entry into the United States. If inspection of the sample discloses that pests of the family Tortricidae (fruit-leaf roller moths) are not present in the lot sampled, the fruit may be imported without treatment. If any such pests are found upon inspection, the lot must be treated with methyl bromide as prescribed in part 305 of this chapter.
- (b) Treatment of apples and pears from Australia for fruit flies. (1) Apples from Australia (including Tasmania) may be imported without treatment for the following fruit flies if they are imported from an area in Australia that meets the requirements of §319.56–5 for pest freedom: Mediterranean fruit fly (Ceratitis capitata), the Queensland fruit fly (Bactrocera tryoni), Bactrocera aquilonis, and B. neohumeralis.
- (2) Pears from Australia (including Tasmania) may be imported without treatment for the following fruit flies if they are imported from an area in Australia that meets the requirements of §319.56-5 for pest freedom: Mediterranean fruit fly (Ceratitis capitata), the Queensland fruit fly (Dacus tryoni), Bactrocera jarvisi, and B. neohumeralis.
- (3) Apples and pears from Australia that do not originate from an area that is free of fruit flies must be treated for such pests in accordance with part 305 of this chapter. If an authorized treatment does not exist for a specific fruit fly, the importation of such apples and pears is prohibited.

## §319.56-21 Okra from certain countries.

Okra from Brazil, Colombia, Ecuador, Guyana, Mexico, Peru, Suriname, Venezuela, and the West Indies may be imported into the United States in accordance with this section and all other applicable provisions of this subpart.

(a) Importations into pink bollworm generally infested or suppressive areas in the United States. Okra may be imported into areas defined in §301.52-2a as pink bollworm generally infested or suppressive areas, provided the okra is imported in accordance with the re-

- quirements of §319.56-3. Upon entry into the United States, such okra is immediately subject to the requirements of Subpart—Pink Bollworm (§§301.52 through 301.52-10) of this chapter.
- (b) Importations into areas south of the 38th parallel that are not pink bollworm generally infested or suppressive areas. (1) During December 1 through May 15, inclusive, okra may be imported into areas of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Nevada, North Carolina, South Carolina, Tennessee, or any part of Illinois, Kentucky, Missouri, or Virginia south of the 38th parallel subject to the requirements of §319.56–3.
- (2) During May 16 through November 30, inclusive, okra may be imported into areas of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Nevada, North Carolina, South Carolina, Tennessee, or any part of Illinois, Kentucky, Missouri, or Virginia south of the 38th parallel if treated for the pink bollworm in accordance with an approved treatment listed in part 305 of this chapter.
- (c) Importations into areas north of the 38th parallel. Okra may be imported into Alaska, Colorado, Connecticut. Delaware, Hawaii, Idaho, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, Vermont, Washington, West Virginia, Wisconsin, Wyoming, the District of Columbia, or the U.S. Virgin Islands, or any part of Illinois, Kentucky, Missouri, or Virginia, north of the 38th parallel, subject to the requirements of §319.56-3.
- (d) Importations into areas of California that are not pink bollworm generally infested or suppressive areas. (1) During January 1 through March 15, inclusive, okra may be imported into California subject to the requirements of §319.56-3
- (2) During March 16 through December 31, inclusive, okra may be imported into California if it is treated for the pink bollworm in accordance with an approved treatment listed in part 305 of this chapter.

(e) Imports from Andros Island of the Bahamas. Okra produced on Andros Island, Commonwealth of the Bahamas, may be imported into the United States in accordance with §319.56–3.

## §319.56-22 Apples and pears from certain countries in Europe.

- (a) *Importations allowed*. The following fruits may be imported into the United States in accordance with this section and all other applicable provisions of this subpart:
- (1) Apples from Belgium, Denmark, France, Germany, Great Britain, Italy, the Netherlands, Northern Ireland, Norway, Portugal, the Republic of Ireland, Spain, Sweden, and Switzerland;
- (2) Pears from Belgium, France, Great Britain, Italy, the Netherlands, Portugal, and Spain.
- (b) Trust fund agreement. Except as provided in paragraph (h) of this section, the apples or pears may be imported only if the national plant protection organization (NPPO) of the exporting country has entered into a trust fund agreement with APHIS in accordance with §319.56–6.
- (c) Responsibilities of the exporting country. The apples or pears may be imported in any single shipping season only if all of the following conditions are met:
- (1) Officials of the NPPO must survey each orchard producing apples or pears for shipment to the United States at least twice between spring blossoming and harvest. If the officials find any leaf miners that suggest the presence of Leucoptera malifoliella in an orchard, the officials must reject any fruit harvested from that orchard during that growing season for shipment to the United States. If the officials find evidence in an orchard of any other plant pest referred to in paragraph (g) of this section, they must ensure that the orchard and all other orchards within 1 kilometer of that orchard will be treated for that pest with a pesticide approved by the APHIS, in accordance with label directions and under the direction of the plant protection organization. If the officials determine that the treatment program has not been applied as required or is not controlling the plant pest in the orchard, they must reject any fruit har-

- vested from that orchard during that growing season for shipment to the United States.
- (2) The apples or pears must be identified to the orchard from which they are harvested (the producing orchard) until the fruit arrives in the United States.
- (3) The apples or pears must be processed and inspected in approved packing sheds as follows:
- (i) Upon arrival at the packing shed. the apples or pears must be inspected for insect pests as follows: For each grower lot (all fruit delivered for processing from a single orchard at a given time), packing shed technicians must examine all fruit in one carton on every third pallet (there are approximately 42 cartons to a pallet), or at least 80 apples or pears in every third bin (if the fruit is not in cartons on pallets). If they find any live larva or pupa of Leucoptera malifoliella, they must reject the entire grower lot for shipment to the United States, and the NPPO must reject for shipment any additional fruit from the producing orchard for the remainder of the shipping season.
- (ii) The apples or pears must be sorted, sized, packed, and otherwise handled in the packing sheds on grading and packing lines used solely for fruit intended for shipment to the United States, or, if on grading and packing lines used previously for other fruit, only after the lines have been washed with water.
- (iii) During packing operations, apples and pears must be inspected for insect pests as follows: All fruit in each grower lot must be inspected at each of two inspection stations on the packing line by packing shed technicians. In addition, one carton from every pallet in each grower lot must be inspected by officials of the plant protection service. If the inspections reveal any live larva or pupa of Leucoptera malifoliella, the entire grower lot must be rejected for shipment to the United States, and the plant protection service must reject for shipment any additional fruit from the producing orchard for the remainder of that shipping season. If the inspections reveal any other insect pest referred to in paragraph (g) of this section, and a treatment authorized in
